

Proposed amendment to Appendix 10 to the GCU

Record of amendments

Amended by	Date	Module	Amendment
André Brozy	13.01.2023	M03.006	First draft
WG Neandertal	04.09.2023	M03.006	Update
WG MNT	30- 31/01/2024	M03.006	Update
WG MNT decision	09- 10/04/2024	M03.006	Update
WU SG decision	14/05/2024	M03.006	Approved by WU SG
GCU JC decision	04/06/2024	M03.006	Approved by GCU JC

Title	M03.006: Stopcock removal/installation. M03.006 : Démonter/monter le robinet d'arrêt d'air M03.006: Luftabsperrhahn ab/an	
Proposed amendment made by RU/keeper/other:	WG Neandertal	
Proposed amendment to:	<input checked="" type="checkbox"/> Appendix 10	<input type="checkbox"/> Annex 6 (appendix 10)
Proposer:	A.Brozy	
Location, date:	13/01/2023	
Concise description:		

1. Starting point (current situation):

1.1. Introduction

The task of the working group for the modularization of appendix 10 of the GCU is to describe new modules containing the measures to restore fitness to run and to create a link to the damage codes of appendix 9 as well as to the coding of the works of appendix 10 annex 6

1.2. Mode of operation

The results of the working group are submitted as amendment to the working group appendix 10 and so introduced in the regular process for validation of amendments

1.3. Anomaly/description of problem

Appendix 10 does not currently provide a comprehensive package of works to be carried out in order to restore the fitness to run. By introducing modularisation, this problem is solved. Modularisation supports the further digitalisation.

1.4. Does this concern a recognised code of practice* (e.g. ISO, EN)?

No Yes (state which):

* "a written set of rules that, when correctly applied, can be used to control one or more specific hazards." (Source: Regulation (source: Regulation EC 402/2013, Article 3)

"Technical provisions laid down in writing or conveyed verbally and pertaining to procedures, equipment and modes of operation which are generally agreed by the populations concerned (specialists, users, consumer and public authorities) to be suitable for achieving the objective prescribed by law, and which have either proven their worth in practice or, it is generally agreed, are likely to within a reasonable period of time". (Source: BMJ Handbuch der Rechtsförmlichkeit – guide published by German Ministry of Justice)

2. Target situation

2.1. Elimination of anomaly/problem (solution sought)

See below point 3

3. Additional text (relates only to proposed amendments to GCU Appendix 10):

Colour codes for amendment proposals:

Black: Currently applicable text; provides information and remains unchanged

Red: New text

Blue: (may be crossed out): Text to be deleted

Symbols are used as follows:

✉ Communication between keeper and workshop

📝 Documentation of the work acc. to app. 10 annex 6

Note: if changes of the annex 6 are required, they have to be named below.

The damage codes of section 2 of this amendment proposal will be updated in the three languages in table in the introduction.

Damage code Appendix 9	Measures to restore the fitness to run
3.3.5.1 Pneumatic part, stopcock unusable, leaking, warped or handle missing. 3.3.5.2 Pneumatic part, stopcock, stopping device missing or visibly damaged	M03.006: stopcock removal/installation M03.006: stopcock removal/installation
Code d'anomalie Annexe 9	Mesures pour rétablir l'aptitude à la circulation
3.3.5.1 Partie pneumatique, robinet d'arrêt d'air utilisable, non étanche, forcé, poignée manquante 3.3.5.2 Partie pneumatique, robinet d'arrêt d'air, dispositif d'arrêt manquant ou visiblement avarié	M03.006 : Démonter/monter le robinet d'arrêt d'air M03.006 : Démonter/monter le robinet d'arrêt d'air
Schadcode Anlage 9	Maßnahmen zur Wiederherstellung Lauffähigkeit
3.3.5.1 Pneumatischer Teil, Luftabsperrhahn, nicht gangbar, undicht, verbogen, fehlender Griff 3.3.5.2 Pneumatischer Teil, Luftabsperrhahn, Arretievorrichtung fehlt oder ist offensichtlich beschädigt	M03.006: Luftabsperrhahn ab/an M03.006: Luftabsperrhahn ab/an

EN**M03.006: stopcock removal/installation**

Technical requirements:	-
Organisational preparations:	<input checked="" type="checkbox"/> Request stop cock with locking device from keeper with → Form H according to Appendix 7
No. Work task, technical target state and additional notes	
1.	<p>Dismantle of the brake hose and stopcock</p> <ul style="list-style-type: none"> • Dismantle the brake hose → M03.005 • Dismantle the anti-twist device (locking plate) • Dismantle the defect stopcock using suitable tool
2.	<p>Assembly of the brake hose and stopcock</p> <ul style="list-style-type: none"> • Clean the screw threads of the main pipe and the stopcock. • Prepare the screw connection with a suitable sealant (sealing hemp, sealing tape or similar) • Mount the stopcock using suitable tools • Mount the anti-twist device (locking plate) • Assembly of the brake hose →M03.005
3.	Check the tightness of the brake →M03.007

FR**M03.006 : Démonter/monter le robinet d'arrêt d'air**

Conditions techniques :	-
Mesures préparatoires :	<input checked="" type="checkbox"/> Demander le robinet d'arrêt d'air avec dispositif d'arrêt au détenteur avec → modèle H selon l'annexe 7
n° Contenu de l'intervention, état technique théorique et autres indications	
1.	<p>Démonter l'accouplement de frein et le robinet d'arrêt d'air défectueux</p> <ul style="list-style-type: none"> • Démonter l'accouplement de frein →M03.005 • Démonter dispositif anti-rotation (tôle de sécurité) • Démonter le robinet d'arrêt d'air à l'aide d'outils appropriés
2.	<p>Monter le nouveau robinet d'arrêt d'air et l'accouplement de frein</p> <ul style="list-style-type: none"> • Nettoyer le filetage de la conduite générale et du robinet d'arrêt d'air • Préparer l'assemblage vissé à l'aide d'un moyen d'étanchéité approprié (p. ex. chanvre, ruban d'étanchéité) • Raccorder le robinet d'arrêt d'air à l'aide d'outils appropriés à la conduite générale • Monter dispositif anti-rotation (tôle de sécurité) • Monter l'accouplement de frein →M03.005
3.	Vérifier l'étanchéité du système de frein → M03.007

DE**M03.006: Luftabsperrhahn ab/an**

Technische Voraussetzungen:	-
Organisatorische Vorbereitungen:	<input checked="" type="checkbox"/> Luftabsperrhahn mit Arretiervorrichtung beim Halter mit → Muster H nach Anlage 7 abfordern
Nr. Arbeitsinhalt, technischer Sollzustand und sonstige Hinweise	
1.	<p>Demontage der Bremskupplung und des defekten Luftabsperrhahns</p> <ul style="list-style-type: none"> • Bremskupplung demontieren → M03.005 • Verdreh sicherung (Sicherungsblech) demontieren • Luftabsperrhahn unter Verwendung von geeignetem Werkzeug demontieren
2.	<p>Montage des neuen Luftabsperrhahns und der Bremskupplung</p> <ul style="list-style-type: none"> • Schraubgewinde der Hauptluftleitung und des Luftabsperrhahns säubern • Schraubverbindung mit geeignetem Dichtmittel (Dichthanf, Dichtband o. Ä.) vorbereiten • Luftabsperrhahn unter Verwendung von geeignetem Werkzeug mit Hauptluftleitung verschrauben • Verdreh sicherung (Sicherungsblech) montieren • Bremskupplung montieren →M03.005
3.	Prüfung der Dichtheit der Bremsanlage →M03.007

4. Reason:

Transforming the measures of GCU Appendix 10 into the new modular design

5. Assess potential positive/negative impacts

Assess the possible positive and negative effects (operations, costs, administration, interoperability, safety, competitiveness, etc.) on a scale of 1 (very low) to 5 (very high):

Reasoning behind amendment:

This measure describes the good practice in maintenance and should not have a positive or negative effect on operations, costs, administration, interoperability, competitiveness, but presents an increase on safety.

6. Safety appraisal of proposed amendment

Description of actual/target system, and scope of change to be made (see points 1 and 2).

Performance of risk analysis is unnecessary where only recognised standards are implemented.

Risk analysis conducted by:

6.1. Does the change have an impact on safety?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
Reason: No change in the process	
6.2. Is the change significant?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
Reason: No change in the process	
6.3. Determining and classifying risk	<input checked="" type="checkbox"/> N/A
6.3.1. Effect of change in normal operation:	
6.3.2. Effect of change in the event of disruption/deviation from normal operation:	
6.3.3. Potential misuse of system: <input type="checkbox"/> No <input type="checkbox"/> Yes (describe possible misuse):	
6.4. Have safety measures been applied?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
For each type of risk, one of the following risk acceptance criteria is to be selected: <ul style="list-style-type: none"> • Code of practice • Use of reference system • Explicit risk assessment 	
6.5. Has a risk analysis been submitted to the assessment body?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
Assessment body: Attach the verdict reached by the assessment body	[Appendix]
